

## Student Grade System – Python Code

```
1 # Student Grade System
2 # CAIE Course Program - Social Eagle
3
4 def calculate_grade(mark):
5     """Return the letter grade for a valid mark."""
6     if mark >= 90:
7         return "A"
8     elif mark >= 80:
9         return "B"
10    elif mark >= 70:
11        return "C"
12    elif mark >= 60:
13        return "D"
14    else:
15        return "E"
16
17
18 def main():
19     try:
20         #Asks the user to enter a mark. Converts the input from text to a decimal number using float().
21         mark = float(input("Enter your mark (0-100): "))
22
23         # Validate the mark range - Checks that the mark is between 0 and 100.
24         if mark < 0 or mark > 100:
25             print("Invalid mark. Please enter a number between 0 and 100.")
26             return
27         #Calls calculate_grade(mark).
28         grade = calculate_grade(mark)
29
30         # Display the result - Prints the mark and resulting grade.
31         print(f"Mark: {mark:g} -> Grade: {grade}")
32     except ValueError:
33         print("Invalid input. Please enter a valid number.")
34
35 #ensures main() runs only when this file is executed directly, not when it is imported into another Python file.
36 if __name__ == "__main__":
37     main()
```

## Output Results -Screenshot :-

```
(venv) C:\Users\Admin\GenAI Program\py grade_system.py
Enter your mark (0-100): 90
Mark: 90 -> Grade: A

(venv) C:\Users\Admin\GenAI Program\py grade_system.py
Enter your mark (0-100): 50
Mark: 50 -> Grade: E

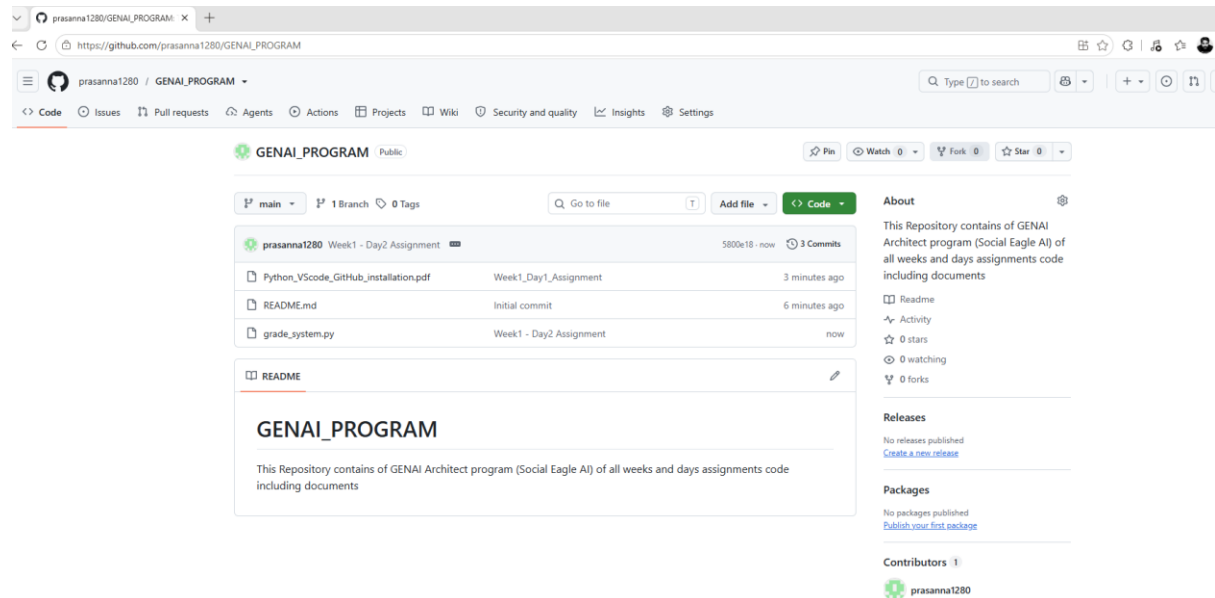

(venv) C:\Users\Admin\GenAI Program\py grade_system.py
Enter your mark (0-100): 120
Invalid mark. Please enter a number between 0 and 100.

(venv) C:\Users\Admin\GenAI Program\py grade_system.py
Enter your mark (0-100): hello
Invalid input. Please enter a valid number.

(venv) C:\Users\Admin\GenAI Program\py
```

## Github Respository Screenshot:-

[prasanna1280/GENAI\\_PROGRAM](https://github.com/prasanna1280/GENAI_PROGRAM): This Repository contains of GENAI Architect program (Social Eagle AI) of all weeks and days assignments code including documents

The screenshot displays the GitHub repository page for `prasanna1280/GENAI_PROGRAM`. The repository is public and contains 3 commits. The files listed are:

| File Name                                          | Commit Message          | Commit Time   |
|----------------------------------------------------|-------------------------|---------------|
| <code>Python_VScode_GitHub_installation.pdf</code> | Week1_Day1_Assignment   | 3 minutes ago |
| <code>README.md</code>                             | Initial commit          | 6 minutes ago |
| <code>grade_system.py</code>                       | Week1 - Day2 Assignment | now           |

The README section is titled `GENAI_PROGRAM` and contains the text: "This Repository contains of GENAI Architect program (Social Eagle AI) of all weeks and days assignments code including documents".

On the right side, the "About" section states: "This Repository contains of GENAI Architect program (Social Eagle AI) of all weeks and days assignments code including documents". Below this, there are sections for "Releases" (No releases published), "Packages" (No packages published), and "Contributors" (1 contributor: prasanna1280).
